

MERGE INTO in Delta Lake — upsert done right

Incremental data often has

- new records
- updated records

Simple inserts are not enough.

MERGE INTO pattern

```
MERGE INTO target t
USING source s
ON t.order_id = s.order_id

WHEN MATCHED THEN
  UPDATE SET
    t.amount = s.amount,
    t.updated_at = s.updated_at

WHEN NOT MATCHED THEN
  INSERT (
    order_id,
    amount,
    updated_at
  )
VALUES (
    s.order_id,
    s.amount,
    s.updated_at );
```

✓ Updates existing rows

✓ Safe re-runs

✓ Inserts new rows

✓ No duplicates

One command. Insert + Update.

MERGE enables safe re-runs without duplicates
